

Join Our Campaign

Yes! My organization would like to join the fight for healthy indoor environmental health and affordable housing.

The affordable housing stock is shrinking and crumbling. Healthy and Affordable Housing for New Yorkers is a right not a privilege. Poor housing conditions lead to mold, pests and unsafe homes. This must come to an end. It is time to take action and hold government agencies and landlords accountable. The WE ACT for Healthy Homes campaign demands a suite of healthy housing policies to be enacted by 2015, ensuring the protection of families, and the maintenance and affordability of housing for all New Yorkers.

Campaign Priorities

- 1. Pass the Asthma Free Homes Bill as a member of the Coalition for Asthma Free Homes.**
- 2. Ensure healthy and affordable housing for all moderate & low income New Yorkers.**
- 3. Protect our homes from mold and toxins.**
